

# LabVIEW Bootcamp

## Description

This 12-week bootcamp is designed to equip you with the fundamental concepts, tools, and functions required to develop functional applications using LabVIEW. The curriculum emphasizes hands-on learning through practical examples. Upon completion, you will be eligible to sit for the Certified LabVIEW Associate Developer (CLAD) exam at no cost.

[What is LabVIEW?](#) A graphical programming environment. You can turn your flowcharts right into a program without writing any text-based code.

[What is CLAD?](#) It is an entry-level industry certification that proves your LabVIEW skills.

Format: 1-hour Multiple Choice Exam (Online).

Benefit: Earn a professional digital badge to boost your Resume/CV.

Prerequisite: None! Our bootcamp covers all the required training (Core 1 & 2) to get you ready.

## What You Will Learn:

We cover the material from the official LabVIEW [Core 1](#) and [Core 2](#) courses.

## Course Highlights:

1. Basic Features: You will explore all the main and necessary features of LabVIEW.
2. Hands-On Practice: We include examples and exercises to make sure you fully understand and can use the material.
3. Mini-Project: Apply theoretical knowledge to build a functional application. This exercise validates your programming proficiency and ensures readiness for the CLAD examination.
